## STECHDREHEN MIT SEITLICHEM VERFAHREN

GROOVING WITH LATERAL MOVEMENT

## TOOLS FOR PRODUCTIVITY

Die optimale spanende Bearbeitung eines Werkstücks lässt sich längst nicht mehr auf den Schneidprozess beschränken. Steigende technologische und wirtschaftliche Herausforderungen verlangen nach hoch effizient ablaufenden Zerspanprozessen. Zu diesem Zweck haben wir das Programm SPK<sup>+</sup> - The Productivity Experts mit der Formel: **Werkzeug + Technologie + Anwendung = mehr Produktivität bei geringeren Kosten**, entwickelt. Schon heute belegt eine Vielzahl konkreter Anwendungsfälle, dass die Formel ein großes Plus an Produktivität für unsere Kunden bedeutet. Daher versehen wir unsere Produkte in Zukunft

*Achieving the optimal machining of a workpiece is no longer solely dependent on the cutting process. Increasing technological and economical challenges require highly efficient machining processes. To this end, we have developed the program "SPK<sup>+</sup> - The Productivity Experts" with the formula: **tool + technology + application = increased productivity with lower costs**. It has already been shown that the formula means a boost in productivity for our customers in many applications. In the future, we will draw attention to this by launching a "productivity compass"*

als äußeres Zeichen mit dem Qualitätssiegel „**Produktivitätskompass**“, das für unsere Tools for Productivity steht. Überall dort, wo Sie unserem Produktivitätskompass begegnen, zeigt er Ihnen, dass der maximale Produktivitätsbeitrag beim Zerspanen im Vordergrund steht. Ob auf unseren Schneidplatten, Werkzeugträgern oder gar auf Bearbeitungsmaschinen, wenn der Zerspanprozess vor Ort durch unser Engineering optimiert wurde. Dabei arbeiten wir von Anfang an gemeinsam mit unseren Kunden. Dafür stellen wir hoch spezialisierte Fachleute in den wesentlichen Märkten der Welt zur Verfügung. Auf diese Weise garantieren

*as a visible sign and seal of quality. The compass stands for our Tools for Productivity. Wherever you find our productivity compass, it will show you that the maximum contribution to productivity is the focus in machining. Whether on our inserts, tools or even on processing machines, whenever the machining process has been optimised by our engineering on location. We work together with our customers from the beginning and provide them with highly specialised experts in the world's most important markets. In this way, we can guarantee that using our*

wir, dass der Einsatz unserer Tools for Productivity - **Werkzeug + Technologie + Anwendung** - zielsicher und punktgenau zu einem perfektionierten Zerspanen und damit zu höchst möglicher Produktivität führt. Auf die daraus resultierenden Anforderungen sind wir mit unseren Hochleistungsschneidstoffen, Präzisionswerkzeugsystemen und unserem umfangreichen Serviceleistungsspektrum perfekt ausgerichtet. Unser Produktivitätskompass ist das Produktivitätssiegel, dem Sie vertrauen können. Mehr Informationen hierzu finden Sie unter **www.tools-for-productivity.com**

*Tools for Productivity – **tool + technology + application** – will guide you directly to your goal of perfected machining and highest possible productivity. Our high performance cutting materials, precision tooling systems and our extensive range of services are perfectly tailored to meet the demands resulting from higher productivity. Our productivity compass is the productivity seal you can trust. More information can be found at: **www.tools-for-productivity.com***

# Das Stechsystem RAG - Radial- und Axialstechen mit seitlichem Verfahren

## The RAG Grooving System - Radial and axial grooving with lateral movement

Das Stechsystem wurde speziell für das prozesssichere radiale und axiale Stechen in GJL (GG)- und GJS (GGG)-Werkstoffe und zum seitlichen Verfahren konzipiert. Die neue Doppelprisma-Klemmtechnologie nimmt Querkräfte sicher auf und hält die Stechplatte positionsgenau im Plattensitz. Damit lassen sich auch seitliche Vorschubbewegungen prozesssicher realisieren. Je nach Auslegung der Werkzeuge, können beim seitlichen Verfahren Stechtiefen bis 3 mm bei Vorschüben bis 0,25 mm und

*The grooving system is designed specifically for radial and axial grooving in GJL (grey cast iron) and GJS (ductile cast iron) materials and for lateral movement, and ensures complete process reliability. The new double prism clamping technology is able to securely absorb transverse forces while holding the grooving insert in position in the insert seating. It also facilitates lateral feed movements with process reliability. Depending on the tool design, grooving depth of up to 3 mm with feed rates up to 0.25 mm*

Schnittgeschwindigkeit bis zu 800 m/min gefahren werden. Das Stechschwert und die Klemmelemente überzeugen als extrem stabiles Gesamtsystem. Das System ist modular aufgebaut, Stechschwert und Klemmfinger sind einfach und schnell austauschbar und aus hochwarmfestem Material gefertigt.

Es sind Stechbreiten von 4 bis 8 Millimeter erhältlich. Wird der Grundhalter mit entsprechendem Stechschwert ausgerüstet, sind Stechtiefen bis zu 30 Millimeter mög-

*and cutting speeds of up to 800 m/min can be attained with lateral movement. The grooving blade and clamping elements together form an extremely stable complete system. The system is modular and features a grooving blade and clamping element that are made from high temperature-resistant material and are quick and easy to replace.*

*It is available for grooving widths between 4 mm and 12 mm. If the tool holder is equipped with the appropriate grooving*

lich. Durch das Stechdrehen mit seitlichem Verfahren lassen sich mehrere Bearbeitungsschritte mit nur einem Werkzeugsystem abdecken. Das spart weitere Werkzeuge und damit auch Werkzeugplätze auf dem Revolver. In Kombination mit unseren Hochleistungsschneidstoffen steigert das Stechsystem RAG die Prozessflexibilität und gleichzeitig die Produktivität für eine schnellere und kostengünstigere Produktion.

*blade, grooving depths of up to 30 mm are attainable. Grooving with lateral movement means that several machining steps can be performed by a single tool system. This means that additional tools are not required, which saves space on the tool turret. When further combined with our high-performance cutting materials, the RAG grooving system increases both process flexibility and productivity, ensuring a faster and more cost-efficient production process.*

### EASY CHANGE TECHNOLOGIE

Durch die EASY Change Technologie wird auch ein einfacher Wechsel von keramischen Schneidplatten und CBN-Schneidplatten ermöglicht, ohne den Klemmfinger oder das Schwert auszutauschen.

*EASY Change Technology also allows easy exchangeability of ceramic inserts and CBN inserts without the need to replace the clamping finger or the grooving blade.*
